

# TX360

## Real-Time Situational Awareness

With TX360®, security operators make faster, better informed decisions with highly relevant, real-time alerts and a comprehensive common operating picture of intel from around the world or down the street.

Quickly identifying and acting upon relevant security issues is vital to asset safety, brand reputation and business continuity. Proactive monitoring of threats and emerging situations can help mitigate risk and improve response and recovery.

TX360 is a cloud-based, 24/7, all-hazards threat monitoring and situational awareness platform that enables highly secure and targeted delivery of critical information to security professionals and corporate leaders—when and where they need it. TX360 adds surge resources to security operations by:

- Speeding up response to threats via proactive, continuous threat monitoring
- Streamlining operations and covering more ground through aggregation and filtering of multiple information sources
- Providing world class situational awareness and threat monitoring capabilities that can be deployed in hours, not months

### Key Features

- Cloud-based: Built on Microsoft's Azure Cloud provides high availability, scalability, redundancy and SaaS delivery model.
- Easy to use: Transmits intelligence to executive and field recipients without training, while giving expert users a short learning curve for a full range of creation capabilities.
- Rapid to deploy: Implements within hours versus weeks/months for other solutions.
- Customizable: Delivers tailored content without programming by customer personnel.
- Configurable: Fits all organizations, from a small business in one city to a global corporation with thousands of locations, and scales easily from a few users to thousands of users.
- Highly secure: Offers protected environment with encrypted communication and enables control over who receives information.
- Integrated: Aligns with other systems, from social media sources to proprietary global threat feeds, as well as custom options and an API for more advanced development.

### Four Pillars of TX360:

- **Intelligence Channels:**  
Gather late-breaking intelligence from an expansive gallery of trusted sources, or import and filter your own feeds.
- **Smart Alerts:**  
Deliver only relevant alerts and updates to concerned parties, tailored to each recipient's authorization, preferences, and profile.
- **Dashboards:**  
Monitor threats in real time on a common operating picture dashboard and determine the potential impact of an incident on your assets.
- **Asset Monitoring:**  
Assign proximity alerting to be set up for multiple organizational assets.
